R902T-26GHz Radar Level Meter

File Number: RII202003LM

BEST MEASUREMENT PERFORMANCE

- Best measurement performance on liquid
- Optimum level measurement
- Reliable level measurement for the most complicate applications
- Excellent design to reduce installation cost and eliminate daily maintenance

BEST FIT- FOR- APPLICATION

- Wide range up to 20 meters
- Wide application of hygienic, cryogenic, high pressure and high temperature
- Wide variety of I/O and expansive communication protocols

OVERVIEW

This series of radar level meter adopted 26G high frequency radar sensor, the maximum measurement range can reach up to 30 meters. Antenna is optimized further processing, the new fast microprocessors have higher speed and efficiency can be done signal analysis, the instrumentation can be used for reactor, solid silo and very complex measurement environment.

PRINCIPLE

Radar level transmitter antenna microwave pulse is narrow, the downward transmission antenna. Microwave exposure to the medium surface is reflected back again by the antenna system receives, sends the signal to the electronic circuit automatically converted into level signals (because the microwave propagation speed, electromagnetic wave to reach the target and the reflected back to the receiver this time is almost instantaneous).

- Range set
- В Low adjustment
- С High
- D Blind area

Datum measurement: Screw thread bottom or the sealing surface of the flange.

Note: Make sure the radar level meter the highest level cannot enter the measuring blind area (Figure D shown below).

DESIGN & BENEFIT

- Small antenna size, easy to install; Non-contact radar, no wear, no pollution.
- Almost no corrosion, bubble effect; almost not affected by water vapor in the atmosphere, the temperature and pressure changes.
- Serious dust environment on the high level meter work has little effect.
- A shorter wavelength, the reflection of solid surface inclination is better.
- Beam angle is small, the energy is concentrated, can enhance the ability of echo and to avoid

Mar. 2020, Vision 3.0 File Number: RII202003LM

interference.

- ◆ The measuring range is smaller, for a measurement will yield good results.
- ◆ High signal-to-noise ratio, the level fluctuation state can obtain better performance.
- ♦ High frequency, measurement of solid and low dielectric constant of the best choice.

APPLICATION

Industries					
♦	Chemicals	♦	Pharmaceuticals		
♦	Food & Beverages	♦	Power Plant		
•	Machinery	♦	Pulp & Paper		
•	Minerals & Ming	♦	Water		
♦	Oil & Gas	♦	Waste Water

MODEL SELECTION

• R902T-

Type

- P Standard (Non-explosion-proof)
- I Intrinsically safe (Exia IIC T6 Ga)
- G Flameproof Type (Exd IIC T6 Gb)

Process Connection / Material

- A Flange DN80 / Stainless Steel 304
- B Flange DN100 / Stainless Steel 304
- Y Special Custom Made

Antenna Type / Material

- A Internal tapered rod antenna PVDF / 78mm
- B Internal tapered rod antenna PFA / 78mm

Seal Up / Process Temperature

- V Viton / (-40~130) °C
- P PFA/ (-40~250) °C

Electronic Unit

- 3 (4~20) mA / 24V DC / HART 2-wire system
- 4 (4~20) mA / 220V AC / HART 4- wire system
- 5 RS485 / Modbus / 6~24V/ Four wire system

Outer Covering / Protection Grade

- L Aluminum / Single chamber / IP67
- H Aluminum / Double chamber / IP67
- G Plastic / Single chamber / IP65
- K Stainless steel / Single chamber / IP67

INSTALLATION

1. The Installation Requirements

Installation guide:

R902T product used to measure corrosive liquids, vapors, volatile liquids and to prevent condensation during measurement.

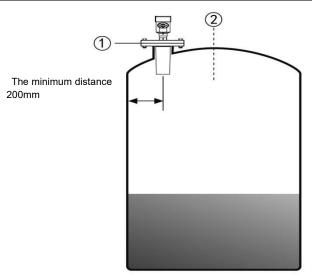

It needs to install flange connection.

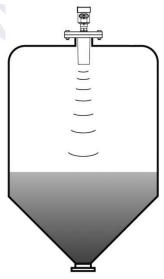

Be installed in the diameter of the 1/4 or 1/6. Note: The minimum distance from the tank wall should be 200mm.

Note: ① datum

②The container center or axis of symmetry

 For the top of the flat conical tank, meter can be installed in the middle of the tank top to the bottom of the cone to ensure measurement.

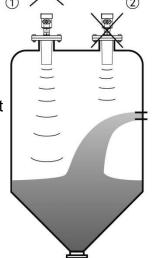

➤ Conical tank cannot be installed above the feed port **Note**: outdoor installation should adopt sunshade.

- ① Correct
- ② Error rainproof measures

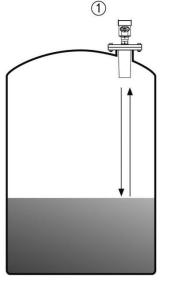

> The instrument cannot be installed in the arched or domed roof intermediate. In addition to produce indirect echo is also affected by the echoes. Multiple echo can be larger than the real

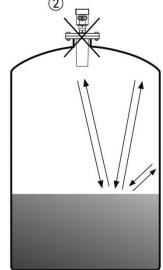

Mar. 2020, Vision 3.0 File Number: RII202003LM

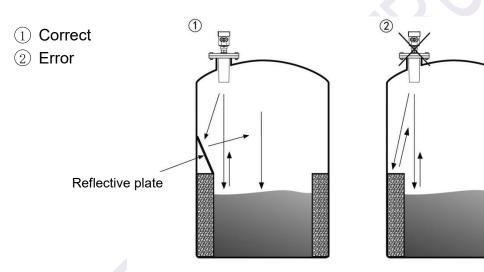

value of signal echo, because through the top can concentrate multiple echo. So cannot be installed in a central location.

- ① Correct
- ② Error

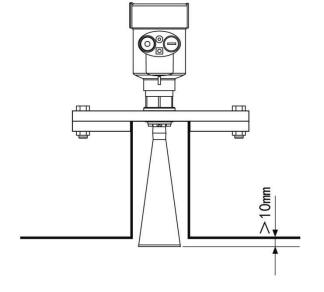

> There are obstacles affecting measurement needed reflection plate.

The role of the reflecting plate is refracted away the obstacle signal.

• Height of nozzle:

Antenna extends into the tank at least 10mm.

ELECTRICAL CONNECTION

• The power supply voltage:

	., · · · · · · · · · · · · · · · · · · ·
(4to20)mA/HART	The power supply and the output current signal sharing a two core shield
(2-wire system)	cable. The supply voltage range see technical data. For intrinsically safe
	type must be a safety barrier between the power supply and the
	instrument.
(4to20)mA/HART	Separate power supply and the current signal, respectively using a
(4-wire system)	two-core shielded cable. The supply voltage range see technical data.
RS485 / Modbus	Power supply and Modbus signal line separated respectively using a
	two-core shielded cable, the power supply voltage range see technical
	data.

Connection mode:

24V two wire wiring diagram as right:

6 to24V RS485/Modbus wiring diagram as right:

Explosion Proof Connection

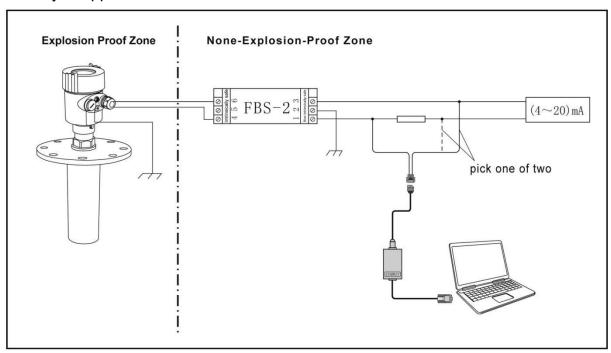

The intrinsic safety version sensors (Exia IIc T6) use Alu-die casting housing and filling Silicone rubber sealants internal structure aimed to prevent sparks resulted from circuit failure from leaking out. It is applicable for the continuous level measurement of flammable medium under Exia IIc T6.

A safety barrier FBS-2 must be used together with the intrinsic safety instrument. It is an associated device to this product for the power supply of this product. The main specification is intrinsic safety: Exia IIC, voltage of power supply: $24VDC \pm 5\%$, short-circuit current: 135mA, operating current: 4 to 20mA.

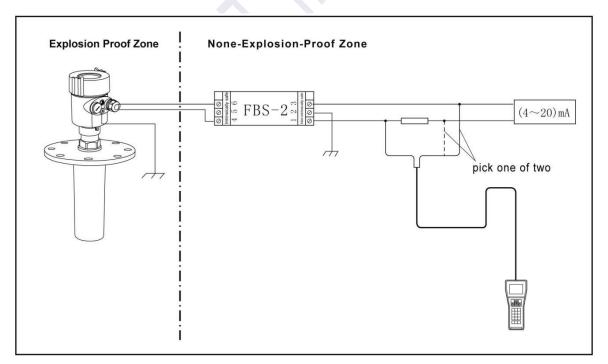

Mar. 2020, Vision 3.0 File Number: RII202003LM

All cables must be shielded. The max length is 500m for the cable from the barrier to the sensor. Stray capacitor $\leq 0.1~\mu$ F/Km, stray inductance 1mH/Km. Instrument must be connected to the ground potential. Any unapproved associated device is not allowed to be used.

Adjustment with Software

Adjustment with HART Handheld Programmer

Mar. 2020, Vision 3.0 File Number: RII202003LM

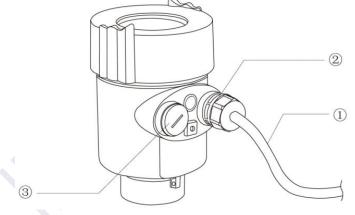

Safety instructions:

- Please observe the local electrical code requirements!
- Please comply with local requirements for personnel health and safety regulations.
 All electrical components of instrument operation must be completed by the formal training of professionals.
- ➤ Please check the instrument nameplate to provide product specifications meet your requirements.

 Please make sure that the power supply voltage and instrument nameplate on the requirements.

Enclosure grade:

This instrument meets the enclosure class IP66/67 requirements, please ensure the waterproof cable sealing head. The following diagram:

How to install to meet the requirements of IP67:

Please make sure that the sealing head is not damaged.

Please make sure that the cable is not damaged.

Please make sure that the cable for use with electrical connection specification.

Cable into the electrical interface before its curved downward, ensure that the water will not flow into the shell, see the ①

Tighten the cable seal head, see the 2

Please electrical interface will not use blind plug tight, see the 3

INSTRUMENT COMMISSIONING

- There are three kinds of debugging method:
 - 1) Display / Keyboard
 - 2) Host debugging
 - 3) HART handheld programmer

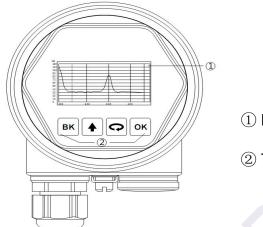

Mar. 2020, Vision 3.0 File Number: RII202003LM

Display / Keyboard:

Please debug the instrumentation by four buttons on the display screen. There are three debug menu languages optional. After debugging is generally used only for display, through the glass window can read measured value very clearly.

Display / Keyboard

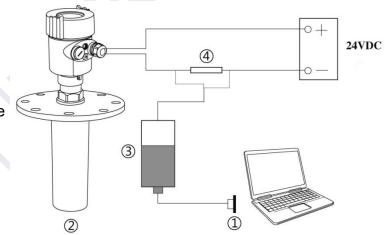

- 1 Liquid crystal display(LCD)
- 2 The key

PC debugging:

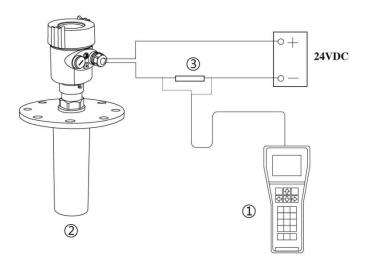

Connected to PC by HART

- (1) RS232 interface or USB interface
- (2) Radar level meter
- (3) HART adapter
- \bigcirc 250 Ω resistor

HART handheld programmer:

- ① HART handheld programmer
- ② Radar level meter
 - \odot 250 Ω resistor

Warning

- Ensure the explosion-proof class marked on the nameplate to meet or exceed the required rating of the relevant installation environment.
- Ensure that the enclosure rating indicated on the nameplate to meet the requirements of the installation environment.
- Ensure that the ambient and process temperature ranges marked on the nameplates to meet the application requirements.
